

General Information

If you have questions concerning

-submissions

-labs

-recitations

-deadlines

-programming errors, need help

-material covered in labs and recitations

Please send mail directly (or Campuswire) to the TAs, especially the TA in charge of the lab or the recitation, and also send mail to the course coordinator (Dheeraj). The course-coordinator handles most of the such issues, by talking to the TAs, or to me if necessary. This is the fastest way.

If you have questions concerning the material covered in lectures, or have an issue you have tried but are unable to resolve with a TA, then talk to me after lecture and we will solve it then and /or set up a time to meet for longer. Since this is a large class, I am

unable to respond to many of the issues the TAs routinely handle and it takes me longer to respond.
