

Hardware Scavenger Hunt

Name: _____

Date: _____

Part 1: Identify the Parts

Open your assigned device and locate the following components. For each one, write a simple explanation of what it does:

- **CPU (Central Processing Unit):**

- **GPU (Graphics Processing Unit):**

- **Motherboard:**

- **RAM (Random Access Memory):**

- **Storage Device (Hard Drive / SSD):**

- **Power Supply Unit (PSU):**

- **Cooling Fan:**

Part 2: Visual Match

Match each term above to something you saw inside your real device. Describe where you found it or what it looked like.

Example: CPU – Small square chip on the motherboard, often under a fan.

Component	Where You Found It / Description
CPU	
GPU	

Motherboard	
RAM	
Storage	
PSU	
Cooling Fan	

Part 3: Reflection

1. **Which component do you think is the most important? Why?**

2. **Which component surprised you or was hardest to understand?**
